MONITORED OZONE EXCEEDANCE

“CODE ORANGE OZONE ADVISORY”

“UNHEALTHY FOR SENSITIVE GROUPS”

Monday, June 25, 2012

For Immediate Release as of 3:50 PM:

Monday, June 25, 2012

Memphis, TN. –In cooperation with the Arkansas Department of Environmental Quality (ADEQ); the Arkansas Department of Health (ADH); and the Mississippi Department of Environmental Quality (MDEQ), the Shelby County Health Department has issued a “**CODE ORANGE**” **OZONE ADVISORY**, due to a monitored exceedance of the 8-hour National Ambient Air Quality Standard (NAAQS) for ozone **for the Memphis Metropolitan Area**. The Memphis Metropolitan Area includes Shelby County, Tennessee, Crittenden County, Arkansas, and DeSoto County, Mississippi. The afternoon levels of ozone exceeded the eight-hour NAAQS at several monitors around the Memphis metropolitan area. Under existing Air Quality Index guidelines, current air quality throughout the Memphis Metropolitan Area has become “**Unhealthy For Sensitive Groups**” and is expected to remain so until after sunset this evening. *Pollution emissions, a stagnant atmosphere, clear skies, and high temperatures* are the primary factors responsible for this afternoon’s poor air quality. Since Code Orange was **NOT** forecasted today, **MATA bus and trolley fares are NOT discounted to 25-cents today.**

<p>Health Precautions:</p> <ul style="list-style-type: none"> • For Active Children and Adults • For Persons With Respiratory Difficulties • Limit prolonged outdoor activities during afternoon hours • High ozone levels can cause nose, eye, throat, and lung irritation • High ozone levels can aggravate existing conditions and lead to increased potential for illness in this sensitive group 	<p style="text-align: center;">OZONE REDUCTION TIPS RECOMMENDED DURING “CODE ORANGE OZONE ADVISORIES”</p> <ul style="list-style-type: none"> • Refuel cars and lawnmowers after 7:00 pm, avoid spills and do not “top off” tanks • Carpool or mass transit • Combine errands instead of many separate trips • Drive less, especially during peak hours or hot days
