This is the first public meeting as part of the Mid-South Regional Greenprint and Sustainability Plan. But, you may ask, what is a greenprint? Just as a blueprint is a guide and a plan necessary to build a structure, a greenprint is a guide and a plan necessary to build regional connections and accessibility using green space. Parks, natural areas, bike lanes, walking paths, waterways, open space and more will all be included in the plan. These connections will extend throughout neighborhoods in Memphis, into Shelby County as well as surrounding areas including: Crittenden County, AR, Desoto County, MS, and Fayette County, TN.
