

Have you heard of the Memphis Area Rideshare Program?

The **Memphis Area Rideshare Program** is located at the Shelby County Health Department's Air Quality Improvement Branch. The goal of the program is to improve air quality and reduce congestion by taking cars off the road. Fewer cars on the road means a better quality of life for Memphians. Take the hassle out of your daily commute to work and improve air quality by vanpooling, carpooling, taking transit, or biking.

Employees that are interested in **Vanpooling**, the Memphis Area Rideshare Program has partnered with Rideshare by Enterprise to provide a comfortable smarter way to commute. Vanpooling is great for employees that live more than 10 miles from work and live near at least 4 other employees.

Vanpooling can provide a more convenient and less expensive transportation solution versus driving alone. Vanpooling provides the opportunity for unique groups of employees to **save time, save money, and reduce stress** during your commute to and from work.

Driving alone costs nearly \$900 a month and more than \$10,000 per year – vanpooling can reduce those costs significantly.

Vanpooling Benefits include:

- **\$500 monthly vanpool subsidy from Shelby County's Rideshare Program**
- **FREE Guaranteed Ride Home Program**
- **Car Rental Discounts**
- **Preferred Parking**
- **Less Wear & Tear on your vehicle**

Employees that commute to work by **carpool, public transit, or bike** the Memphis Area Rideshare Program has a great benefit for you also!

Emergency Rides Home are offered for employees that commute to work by carpool, transit, or bike when an unexpected emergency arises while at work that causes you to miss your ride home. Register as a commuter with the Memphis Area Rideshare program by going to ShelbyTNHealth.com TODAY!
